About me

I have been a software developer and an UI designer for more than 3 years. I always put my clients first, and deliver the best solutions. I specialize in technologies like Django and Angular/Javascript.

Please visit my portfolio website at thomaslech.io to learn more about the projects I've built and my blogs.

Work experience

May 2015 - **Full stack developer**

August 2015 **GROT Materialy Ogrodzeniowe**

I have built an online e-commerce platform from scratch with Django where customers can purchase fence materials and order a fence set-up service.

August 2015 - **Front-end developer & UI designer**

January 2016 **4G Clinical (USA)**

I optimized and modernized the User Experience of a complex web application replacing existing Bootstrap code with the cutting edge material design framework.

February **Full stack developer & mobile developer**

2016 - August **RNStorage RootxNET**

2016 I have built a hybrid mobile application with Cordova and AngularJS and its back-end side with Django and Django-REST-framework. I have written unit tests covering the whole functionality of the application with Jasmine technology.

November **Lead full stack developer & mobile developer**

2016 - **MathOCR RootxNET**

February I have built a hybrid mobile application with Cordova and AngularJS and its back-end side with Django and Django-REST-framework. This application uses Machine Learning & Computer Vision to read handwritten mathematical formulas from a photo and processes them.

February **Full stack developer**

2018 - now **Askbriefly**

For a long time I have been maintain and developing a complex Django Web application which handles hundreds of requests every hour. I have been working with Docker on a daily basis.
